

**FOR IMMEDIATE RELEASE**

**PREMIER MICRONUTRIENT CORPORATION ANNOUNCES EXPANSION OF EXECUTIVE TEAM**

***PMC adds corporate controller, directors of marketing and hearing health***

NASHVILLE, Tennessee (June 4, 2008) – Premier Micronutrient Corporation (PMC) has expanded the company’s executive team to include Suzanne Wyatt, Gregory Scott and Jennifer Templeton. The trio joins forces with PMC’s corporate headquarters in Nashville.

Suzanne Wyatt joins the PMC team as national director of the company’s Hearing Health Division. Prior to joining PMC, she served as executive director for the EAR Foundation, a national not-for-profit organization, where she organized the foundation’s South Texas and Arizona affiliates. As a former musician, Wyatt has experienced occupational hearing loss and is passionate in her efforts to educate the public about hearing protection. For her many accomplishments throughout twelve years in the hearing health industry, Wyatt was recognized as one of Nashville’s Most Influential Women of 2007 by *Nashville Business Journal*.

Greg Scott joins PMC as the company’s corporate controller. A Nashville native, Greg has more than twenty years experience in accounting, financial analysis and project management in Nashville’s commercial banking industry, most recently serving as regional project manager for Region’s bank. Greg holds a bachelor’s of business administration from Belmont University.

Jennifer Templeton has been named director of marketing for PMC and brings a wealth of strategic marketing expertise to the position. Templeton’s experience includes 12 years working in the European market where she implemented global brand development and strategic planning for some of the world’s most recognized consumer brands in Russia, Germany and the U.K. Templeton holds a Bachelor of Arts degree from Middle Tennessee State University.

Premier Micronutrient Corporation is a nutritional science and evidence based developer of customized formulations of natural vitamins, minerals and antioxidant supplements. These supplements are for use in conjunction with the treatment of certain diseases such as diabetes, cardiovascular disease, cancer, Alzheimer's and Parkinson's disease as well as age and gender specific formulations designed to promote general health. These custom formulations are the product of more than 30 years of scientific and medical research, conducted by PMC founders, primarily Dr. Kedar N. Prasad, on the effects of micronutrients on human health and disease.
